April 2026

Project Objectives

The Jensen Decors website project was developed as part of the 1st Semester CPISM coursework at Aptech Malir. The primary aim was to apply foundational web development skills — HTML5, CSS3, and Vanilla JavaScript — to design and deliver a fully functional, multi-page static website for a real-world interior décor business based in Karachi.

- Design a visually polished, brand-consistent website for Jensen Decors, a premium wall art and interior décor retailer.
- Implement a responsive, mobile-first layout using CSS media queries, ensuring a seamless experience across desktops, tablets, and smartphones.
- Build a multi-page site architecture with four interconnected pages: Homepage, About Us, Products, and Contact Us.
- Develop a functional hamburger navigation menu using Vanilla JavaScript for smooth mobile navigation.
- Apply scroll-reveal animations via the IntersectionObserver API to create an engaging and dynamic user experience.
- Showcase product categories and brand partners through structured grid layouts and interactive UI components.
- Implement client-side form validation on the Contact page to collect and verify user enquiries.
- Integrate a Google Maps embed to display the showroom's physical location.
- Use Google Fonts (Cormorant + Outfit) to establish a refined typographic identity aligned with the brand's premium positioning.
- Practice professional file organisation and document the project according to industry standards.

Website Pages Overview

Page 1 — Homepage (*index.html*)

The main landing page and primary entry point of the website.

The Homepage is the face of Jensen Decors online. It opens with a full-screen hero section featuring a high-quality interior photograph overlaid with the brand tagline — *Walls That Define Elegance* — and two call-to-action buttons directing visitors to explore the product collection or learn about the brand's story.

Below the hero, a stats strip highlights four key brand achievements at a glance: 127+ products, 6 partner brands, 18 years of experience, and 4,000+ happy clients. The categories section presents all six product lines (Metal Wall Art, Wallpapers, Photo Frame Art, Mirror Art, Wall Shelves, Wall Mounted Animals) as a visual grid with hover animations and product counts.

The page also features a testimonials section with three star-rated client reviews, a brands strip showcasing the six partner brands with their product counts, and a brief About Jensen snippet with a showroom image. A dark contact band near the footer drives users to the Contact page, and the footer provides quick navigation across all four pages.

Page 2 — About Us (*about.html*)

Tells the brand's story, showcases the team, and outlines core values.

The About Us page opens with a full-width page hero banner reading *Crafting Beautiful Spaces Since 2005*, establishing the brand's heritage immediately. A two-column story section follows, pairing a craft-focused interior photograph with a narrative about Jensen Decors' origins — from a small Karachi showroom in 2005 to one of Pakistan's most trusted names in wall décor.

The stats strip repeats the four brand KPIs for consistency. Six value cards articulate the brand's philosophy: Quality First, Artisan Craft, Curated Selection, Customer Focus, Trusted Brands, and Lasting Impression — each with a unique decorative icon and description.

A team section introduces the four key personnel: Ahmed Jensen (Founder & CEO), Sara Malik (Head of Design), Usman Raza (Brand Manager), and Nadia Farooq (Customer Experience). Finally, a vertical timeline traces the company's five major milestones from its founding in 2005 through to crossing 4,000 satisfied clients in 2023.

Page 3 — Products (*products.html*)

The full product catalogue page for browsing Jensen Decors' collection.

The Products page serves as the primary catalogue for Jensen Decors' complete range of wall art and décor. It is the destination page for all 'Browse All' and 'View All' calls-to-action present throughout the site, making it a central hub for product discovery.

The catalogue spans 127+ products organised across six categories: Metal Wall Art (24 products), Wallpapers (36 products), Photo Frame Art (18 products), Mirror Art (15 products), Wall Shelves (22 products), and Wall Mounted Animals (12 products). Products are sourced from six brand partners — Gloster (28), UrbanWall (34), Artisan Co. (21), Nordic House (19), Luxe Décor (15), and Forma (10).

The page maintains the same navbar, mobile drawer, and footer as all other pages, ensuring a consistent navigational experience. It is designed to allow customers to visually browse the collection and identify pieces that suit their residential or commercial interior needs.

Page 4 — Contact Us (contact.html)

Provides showroom details, an enquiry form, and a live map embed.

The Contact Us page is designed to make it as easy as possible for potential clients to reach Jensen Decors. A full-width hero banner with the heading *Contact Us* sets the tone, followed by a two-panel layout: an information panel on the left and a contact form on the right.

The information panel displays the showroom's physical address (Plot 14-C, Khayaban-e-Ittehad, Phase VI, DHA, Karachi), two email addresses (info@jensendecors.com and sales@jensendecors.com), two phone numbers, and opening hours (Monday–Saturday 10:00 am–8:00 pm, Sunday 12:00 pm–6:00 pm).

The enquiry form collects first name, last name, email, optional phone number, a subject category (Product Enquiry, Order Status, Showroom Visit, Design Consultation, or Other), and a free-text message. All required fields are validated on the client side using JavaScript, and a success confirmation message is displayed inline upon valid submission.

Below the form, the stats strip appears once more, followed by a Google Maps embed pinned to DHA Phase 6, Karachi, giving visitors a precise visual reference for the showroom location before they visit in person.
